# INTERNATIONAL STUDENT PATHWAYS (IN CANADA)

## The Theory (I)

- **“Pathways” is a multi-faceted concept.**
  - **Conceptual.** Pathways are a construct of institutions, systems, (regulatory) regimes, processes, definitions, etc.
  - **Functional.** Pathways denote a transition from one education sector or level to another. This is typically a “upward” motion, but can also be sideways or even downwards.
  - **Statistical.** One “unit” transitioning from one category to another category. A key issue is the consistency of unit identification, systems integrity.
  - **Economic.** Each pathways action carries an economic value. This value action involves three (+) parties: Sender, receiver, and the individual (+).
  - **Political.** The intent, volume, direction, and outcome of pathways almost always carries a political relevance.

**Pathways are more complex (and technical) than generally assumed**

# INTERNATIONAL STUDENT PATHWAYS (IN CANADA)

## How Do Pathways Function? (II)

- **Upward**
  - The standard model (e.g. upper secondary to college, or language training into university)
  - Progression / life cycle-based
  - Most regulatory regimes focus on this model
- **Sideways**
  - A transfer model (on the same level / within same sector)
  - Many different models (from sandwich to fully articulated to free movers to doubling up)
- **Downwards**
  - Rare
  - Takes place in specific value-add situations (Master's to Certificate)

**For Canada, upward pathways will be the dominant paradigm**

# **CCIEM PATHWAYS PROJECT SCOPE**

## **Foundation Activities and Competitive Intelligence**

- **The creation and definition of a comprehensive list of data and information criteria and attributes required to conduct proper pathways analysis.**
- **The gathering of available data from national, provincial, association and other sources, leading to an inventory of data and information present in Canada.**
- **The creation and mapping of the organizational design of Canadian education (as represented by CCIEM member organizations) with regards to pathway scenarios.**
- **The gathering of perspectives, opinions, and needs of stakeholders (from education providers to governments to associations) in a structured survey.**
- **A scoping of good practices in Canada from around the world, building on the existing re-port. A specific focus will be paid on (a) data and analysis capabilities, and (b) policy design.**

# CCIEM PATHWAYS PROJECT SCOPE

## Project Metrics and Key Research Areas

- **Research on foreign agencies' data classification and collection efforts.**
- **Identification of key competitor countries pathways system (e.g. UK, Australia, Germany, USA, etc.)**
- **Stakeholder consultations through an on online survey (130+ respondents) and expert interviews (90+) across all sectors, Provinces and Territories, federal and intergovernmental bodies.**
- **12 case studies covering intra-sector and cross-sector pathways models.**
- **Analysis of international student pathways business models.**

# IMPLICATIONS FOR CANADIAN INSTITUTIONS

- **The importance of pathways has become widely acknowledged.**
- **Knowledge, practices, access to information, etc. differ between institutions. Key drivers are (a) sector, (b) size, and (c) less so public versus private.**
- **Data availability and quality has been identified as a key issue.**
- **The dominant usage pattern centers on marketing and recruiting. Value-add usages such as predictive modeling have been neglected.**
- **Views on options going forward differ, but there is clear support for specific initiatives at a national level (such as a proper pathways framework).**
- **There is a clearly articulated interest in further CCIEM contributions.**
